

## **According to NEP classification of wings(5+3+3+4)**

### **Foundation stage(Nur to 2<sup>nd</sup>)**

Welcome to our vibrant preprimary wing, our holistic approach to education extends beyond the classroom. We have provided a wonderful play area that serves as a playground for both fun and learning. Our children's park and play area are specifically designed to facilitate gross motor development, allowing children to explore, climb, and engage in physical activities that contribute to their overall growth.

We understand the significance of physical activities in a child's development. Our play area is thoughtfully crafted to encourage movement, balance, coordination, and spatial awareness, fostering not only physical development but also enhancing cognitive abilities and social skills through interactive play.

In addition to our engaging play area, we offer specialized classes focused on speaking with confidence. We understand the importance of effective communication skills in a child's development. Our speaking with confidence classes are designed to nurture public speaking skills from an early age, empowering students to express themselves articulately and confidently.

At our Pre-Primary Wing, we believe in a holistic approach to learning, where physical, cognitive, emotional, and social development are equally valued. Through our well-designed play area, speaking with confidence classes, and regular stage exposure, we aim to empower our young learners with the skills and confidence needed to succeed in all facets of life.

### **Preparatory stage(3<sup>rd</sup> to 5<sup>th</sup>)**

**A happy, stimulating, secure learning environment ensures happy, sensitive, life- long learners who will be change makers in society**

The Preparatory Wing at our school is dedicated to nurturing the imagination of our young learners and providing a secure environment for their educational growth. Our primary wing's greatest strength lies in its learner-centric approach and emphasis on experiential learning methods. Here, we employ creative strategies and engaging activities to cultivate well-rounded personalities and instill confidence in our students.

Classroom teaching is supplemented with theatre activities, hands on projects and technology. The recent introduction Interactive panels in the classroom has added an exciting dimension to ICT-integrated education and has opened up immense possibilities for the creative teacher as well as the learner.

We provide regular stage exposure opportunities for our students. Whether it's through presentations, storytelling sessions, or performances, our students gain valuable experience in front of an audience.

Our teachers provide supportive guidance and attention, helping each child build self-assurance and overcome stage fright, fostering a sense of confidence and eloquence.

### **Middle stage(6<sup>th</sup> to 8<sup>th</sup>)**

This module uses an interactive methodology and latest technology to empower students by placing the power of learning in the hands of the learners while they work in groups, exploring and connecting textbook concepts to real life situations.

Classes get introduced to a life skill program that rests on the tenets of 'leadership'. Students are made to understand the multidimensional concepts of leadership through experiential learning.

All these activities and program contribute towards nurturing 21st century learners who will be equipped to face the world of tomorrow. As a part of our holistic approach, we also aim at fostering in these students a love for nature and an appreciation of the beauty around us by introducing gardening to the young children. It is indeed a delight to watch little hands digging up the soil, sowing seeds and watering them joyfully regardless of the cold or the scorching sun. It is an activity which uplifts the soul and humbles the mind, paying a tribute to the magnificence of Mother Nature.

Last but definitely not the least is the mental health program that is offered. Through the workshops conducted and our counselor team, it

provides the emotional anchor to keep our young students well rooted, confident and happy members of society.

The Middle School of Tagore public school provides a challenging and engaging curriculum in which every student develops into a well-grounded young adult. We provide a wealth of opportunities for fostering cognitive and personal development through research, collaboration, and technical knowledge. We offer a holistic environment that allows students to thrive in both curricular and co-curricular activities, enabling them to recognize their potential and build a robust foundation for future academic and extracurricular challenges.

## **Secondary stage(9<sup>th</sup> to 12<sup>th</sup>)**

The Senior Secondary Wing of our school is a dynamic environment designed to prepare students for a bright future. Equipped with state-of-the-art smart labs for all subjects and staffed by energetic, well-qualified faculty members, this wing prioritises individualised attention, project-based learning, and active participation in school governance. Students benefit from a diverse range of subjects, providing them with the best possible learning experience.

In the Secondary Wing, we also focus on experiential learning with a global perspective, aiming to instill immense confidence in our students to navigate the world with ease. This comprehensive approach prepares students to confidently face the challenges of the future and equips them with the skills required for success.

Moreover, our school places a strong emphasis on career counselling for the senior secondary wing. We understand the importance of guiding students as they make crucial decisions about their future paths. Our dedicated career counselling program ensures that students receive the guidance and support they need to make informed choices about their academic and professional pursuits.

At senior school the young adults hone their academic and extra-curricular skills to prepare for their journey into the world outside the protective environs of the school. Innovative and effective teaching methodologies are used by the teachers with focus on the constantly

changing educational pedagogy which enhances academic achievement. Apart from skills and knowledge due attention is also paid to inculcating values which will stand them in good stead in life. Our unique system of instituting a class teacher's interactive period every morning is used to ensure that our students become sensitive and sensible citizens of the world. We are indeed proud that our senior students not only prove their mettle in the academic arena in India and abroad but also distinguish themselves with their strength of character.
